## Democracy Barometer

### Happy Families

(Rules for 3 or more players)

The Deck of 32 cards consists of 8 families. Each family has 4 cards of the same nation with the years 2000, 2005, 2010 and 2015.

A player shuffles all cards and deals them to the players as equal as possible. All players hold their cards so that other players cannot see their card faces. The player to the left of the dealer starts as the active player.

Only the active player takes turns: On their turn the active player chooses one other player and asks them for a specific card (nation and year; e.g. Switzerland 2000). A player may only ask for a nation they hold a card from themselves. If the questioned player has the card they must give it to the active player, who then stays active player. If the questioned player does not have the card they become the new active player. The active player takes a new turn.

Once a player holds a family with all four cards of a nation, these cards are placed in front of them on the table. Whoever runs out of cards in their hands is eliminated from the game. Once all players are eliminated, the game ends. The player with the most families in front of them wins the game.

## Let's play - Democracy Barometer

### Project information & partners

**Project lead:** Saskia Ruth-Lovell, Rebecca Welge and Robert Lovell.

These card games were developed as part of a Demokrative project. **Demokrative - Initiative for civic education** is a non-partisan and non-profit association based in Zurich. Demokrative initiates and promotes offers of civic education for different target groups. Further information about the project can be found at [www.demokrative.ch](http://www.demokrative.ch).

**Funding partners:** The project and the development of the card games was funded by the Centre for Democracy Studies in Aarau, ZDA (**Zentrum für Demokratie Aarau**, Switzerland). All numbers shown on the cards are based on the Democracy Barometer project data set ([www.democracybarometer.org](http://www.democracybarometer.org)).

The english translation as well as the development of the 'Global South' card set was funded by the **German Institute of Global and Area Studies** in Hamburg, Germany ([www.giga-hamburg.de](http://www.giga-hamburg.de)).

Special thanks go to: Olina Welge, Judith Reicherzer and Daniel Messelken for their assistance in the project.

The active player names one function. Then all players read out the corresponding card values on their turn. The player with the highest value collects all cards and moves to the next round. The player who collects all cards wins the game.

player shuffles all cards and deals them to the players as equal as possible. All players hold cards in a race up stack so that only the top card face is visible and the other players cannot see it. The dealer starts as the left of the dealer starts as the active player.

The game consists of 32 cards. Each card has 9 attributes, indicating a function and its value.
